Thanks. I am meeting with King County management next Monday to discuss our next steps. I was leaning toward waiting to approach Mr. Pillon about disposing of surface debris until the well installation access was secured. Do you have an opinion on that?

Best regards,
Jim

Thank you and, yes, we were able to do the near surface soil sampling. We have received the data and ENE is validating and tabulating it now.

Regarding the well installation, we are obtaining access through the courts with DOJ assistance. Here is my understanding of the potential timing...If the worst-case (slowest) process occurs, it will be May before we're back out there. The attorneys don't anticipate that. Here's what we anticipate: the judge has to review the documents. Then he may ask for a hearing or he may make a summary judgement. After the decision is made, I need to schedule the drillers. Their availability will dictate the schedule at that point. I think it may be late March or April before we mobilize.

Hello Jeff,
When you have a chance can you update us on well installation? Also, were you able to get near-surface soil samples in the shop area?

Thanks and welcome back!
Jim
